Make sure you lock is installed on your door and that your door is all the way open. If you have a deadbolt, make sure it is in the locked position. If you have a knob or lever, make sure it is in the locked position. Ensure your door cannot close on its own, or that you have another way to enter your home. Insert current key. Insert the key that currently operates your lock. Rotate the key 90 degrees clockwise. Insert the SmartKey tool fully and firmly into the SmartKey hole. You may feel the tool click inside the lock. Remove the SmarKey tool. Remove the current key. Insert the new key you wish to use with the lock. Make sure your key is FULLY inserted. The edge of the key touches the indent in the cylinder face. Without pushing or pulling the key, rotate it 180 degrees counter-clockwise. Then rotate they key 180 degrees clockwise. Pull the key to make sure it will NOT come out in this position. Rotate the key 90 degrees counter-clockwise, back to the starting position. Remove your new key. You have successfully re-keyed your lock. View Full Re-Keying Manual. Video How to Re-Key Your SmartKey Lock Read More Answer It sounds like you may have accidentally misprogrammed the new cylinder. Please watch the below video for step-by-step instructions on how to recover that cylinder and rekey it to your new key. Video Recovering a Misprogrammed SmartKey Cylinder Read More Answer 1. Hold the handleset on the exterior side of the door and make sure the round edge of the spindle faces the door edge. 2. IF IT IS NOT, pull the spindle out and rotate 180 degrees. Note: The spindle is spring loaded and will retract back when released. 3. Press the latch bolt. 4. Insert the spindle through the latch opening, with both round edges facing the door edge. Read More Answer Please open the Powerbolt 2 Programming Instructions pdf. Read More Answer 1. Open the door. 2. Remove battery cover. 3. Press the program button once. 4. Enter new user code. 5. Press lock button. 6. If programming is successful the keypad will flash green once, and you will hear one beep. Read More Answer You can make guesses, but each three consecutive failed attempts will result in the keypad/touchscreen locking out for 60 seconds.If you forgot your user code, there are two options:1. Add new user codes. For detailed instructions on how to add new user codes, please reference page 3 of the installation guide.2. Reset SmartCode to factory settings to clear existing user codes and add new ones. Reference last page of installation guide. Read More Answer We suggest using warm, soapy water and then towel-dry the hardware. Read More Answer Due to out-of-date software on the Qolsys panel, some Alarm.com users may experience communication errors when using the lock remotely via the Alarm.com app or Alarm.com web portal. Typically, panel software is updated to the latest version during the installation process. In instances where a panel has not been updated, users could see a number of errors while using the Kwikset their Home Connect 620 lock. It is important to note that the communication between the Kwikset Home Connect 620 lock and the Qolsys panel is unaffected. We recommend upgrading Qolsys panel software to the latest version to ensure full functionality while using Kwikset Home Connect 620 lock with the Alarm.com app. Please see instructions below. Instructions: 1) How to check panel software: a. See Qolsys support site for steps on checking and updating panel software. i. IQ2/2+ - Version 2.6.2 ii. IQ4 - Version 4.0.1 2) Affected panel software versions: a. AQ4 versions prior to 4.0.1 3) Initiating panel software upgrade: a. See Qolsys knowledge base for latest released versions and change logs. Affected Model Number's, Devices and user Interfaces: • Kwikset Home Connect 620 model #'s: 98920-xxx, 98930-xxx, and 98690-xxx • Qolsys IQ2/IQ2+ panel using software version older than 2.6.0 or IQ4 using version 4.0.1 or older • Alarm.com app and Web Portal Read More Answer Due to out-of-date software on the Qolsys panel, some Alarm.com users may experience communication errors when using the lock remotely via the Alarm.com app or Alarm.com web portal.
